METAVIC loaders are made entirely in Quebec

With high quality components, hoses with two strands of steel with high resistance to UV rays, and standard hydraulic fittings. The cylinders are designed and manufactured to provide METAVIC unmatched durability.

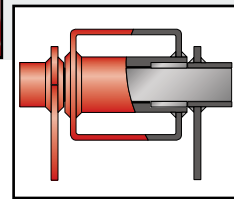

Mast

The mast design allows you to load closer to the guard to maximize trailer loading.

The articulations

Large ring range types combined to the use of main hardened steel joint provide unmatched durability.

METAVIC Team

Is continuously listening to customers and strives to exceed the requirements of the market in terms of stability, smooth operation, maintenance and performance.

Grapple

The curve of the grapple facilitates clamp position to pick up more material per operation. This results in unmatched productivity.

Pressure gauge

The dial allows the operator to ensure that the oil pressure is within specifications in accordance to the manufacturer parameters.
