LOADERS WITH PLATFORM TRAILER

Power in the forest, performance on the road!

MANUFACTURED
IN CANADA

METAVIC

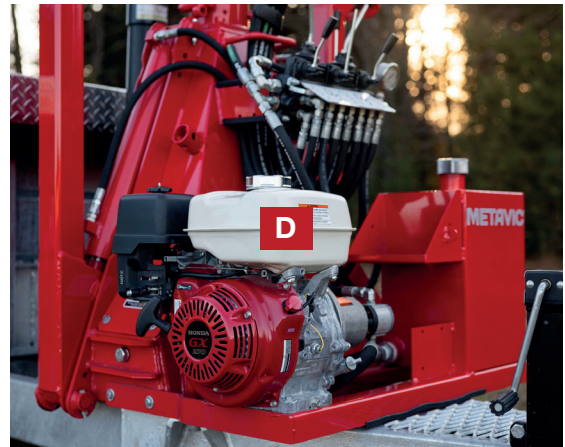

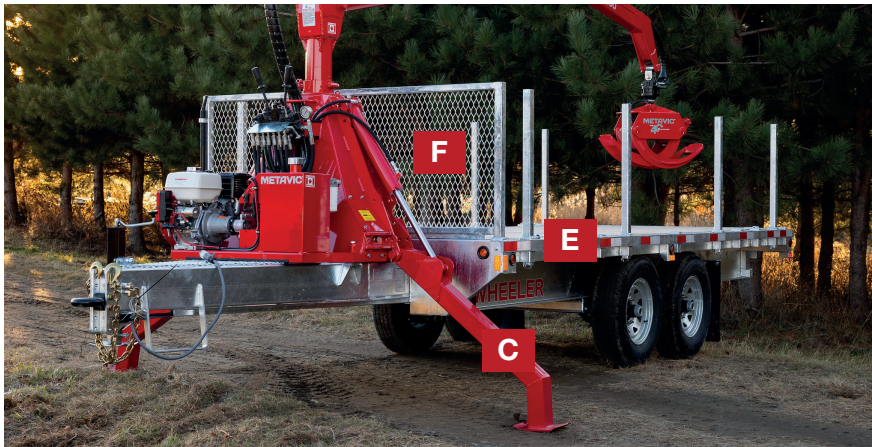

Creating Enjoyment in the Forest.

SINCE 1982
40 YEARS
METAVIC

PROUDLY PRODUCED IN CANADA

VERSATILE AND EFFICIENT!

Our loaders with platform trailer are suitable for individuals producing wood logs, sawmills seeking efficiency, arborists on the go, and government entities and national parks looking for a robust solution tailored to their diverse needs. Metavic provides unparalleled efficiency in handling loads. Thanks to our high-quality hydraulic control, each task becomes a smooth and precise operation.

A - STABLE

Every trailer is designed to accommodate a loader, guaranteeing exceptional balance and stability during load and transport.

D - POWERFUL AND RELIABLE

Our gasoline-powered, Honda hydraulic unit withstands Canada's harsh winters and allows you to operate the loader independently from your vehicle. And our LED lights last longer than ever!

B- REVOLUTIONARY GRAPPLE

Thanks to its exclusive curve, our grapple makes it easy to pick up wood logs without crushing them, increasing lifting capacity while preserving the quality of the wood.

E - EXCEPTIONAL QUALITY

At Metavic, the galvanization of our trailers ensures durable equipment. Furthermore, we pay attention to every detail: the wiring and connectors are sealed.

C - STEADY TRAILER

The butterfly stabilizer legs attached to the loader allow the trailer to stay put during loading or unloading, keeping you anchored to the ground!

F - UTMOST SAFETY

Thanks to our protective plate, which prevents logs from hitting both the loader and you, bringing felled trees closer together becomes easy. This frees up more space for increased productivity. Multiple positions are possible thanks to the removable poles.

SPECIFICATIONS

Loader	1150M14	1150M16	1600
Boom lenght	14 ft	16 ft	16 ft
Loader height	66 in	66 in	84 in
Loader width	40 in	40 in	48 in
Loader rotation	270°	270°	270°
